

WILEY X'S NINE NEW STYLES FOR 2019

Multi award-winning sunglasses manufacturer, Wiley X, has added nine new styles to its already popular portfolio for 2019. Each model has been designed with style, comfort and protection in mind. **TTW** takes a closer look.

Wiley X's 2019 line-up will comprise the WX Aspect, WX Kingpin, WX Compass and WX Vallus sunglasses. Four models, nine styles.

The WX Aspect and WX Kingpin models have been designed with premium spring hinges that enable the wearer to benefit from a more comfortable temple area due to the glasses increasing the range of motion. More traditional sunglass hinges have a 90-degree limit, which can cause pressure on the temples resulting in some unwanted headaches. Both the WX Aspect and WX Kingpin hinges provide a more relaxed fit for the wearer and are well-suited for everyday use. The WX Kingpin features thinner, low-profile temples for a sharp daily lifestyle look and, with its high-wrap frame, sleek accents on the temple and nose, will keep you looking stylish no matter where you wear it.

The WX Aspect is a sleek, lightweight and high-wrap design that blocks out any peripheral light. The thin, yet durable temples have rubber tips to provide you with long-lasting comfort, and of course, the confidence to take these out on any adventure. The WX Kingpin and WX Aspect will both feature two different polarised options to choose from.

Frame - Matte Black
Lens - Polarised Amber Lens/Venice Gold Mirror

Model - ACKNG09
Frame - Matte Graphite
Lens - Polarised Green Lens/ Blue Mirror

SEMI-RIMLESS DESIGN

There is nothing worse than being exposed to the elements while out fishing. Wind, dust and dirt can make for an uncomfortable day on the bank or in the boat. Wiley X's Compass model has been designed to overcome such irritating issues.

The WX Compass features a unique semi-rimless lens design on top of a full frame. However, behind the lens is a removable facial gasket seal that provides exceptional comfort and prevents wind and debris from getting into the wearer's eyes. The removable seal is a perfect feature to adapt to the elements at any given time, so whether you're fishing on your local river or out on the ocean, the Wiley X Compass will keep your eyes on the next catch.

WX COMPASS TECHNICAL SPECIFICATIONS - TWO STYLES

Model - CCCMP04
Frame - Matte Black
Lens - Polarised Amber lens/Venice Gold Mirror

Model - CCCMP07
Frame - Kryptek Neptune
Lens - Polarised Amber Lens/Emerald Mirror

LIGHTWEIGHT

The WX Vallus model takes on a bold approach with broad durable temples that feature accent lines displaying the standout Wiley X logo. While they may look heavy with the large coverage the lenses and temples give you, they are in fact very lightweight indeed. Due to the lightweight nature of the WX Vallus, a comfortable yet secure fit is achieved while providing ultimate eye protection thanks to the American National Standards Institute (ANSI) rated lenses. It's these standards that help ensure the necessary eye and face protection from impact.

WX VALLUS TECHNICAL SPECIFICATIONS - THREE STYLES
